

## JOSS BED - EXTENDED HEADBOARD

3021-EXBD

DISTRICT EIGHT

Despite the overwhelming comfort, what District Eight admires most in Joss Bed is found in a subtle detail— the solid wood bases. While extending the headboard, its sophistication remains genuine, it is crafted with the sinuous curves inspired by ancestral temple roofs that could only be seen in South East Asia.

A serene sleep, a deep rest and effortless relaxation are embodied in the generously extended upholstered headboard. Whether placed in the center or against the wall, you will always experience the utmost comfort that dominates any settings.

— Designer: Toan Nguyen

Oak frame / Steel / Upholstered Platform & Bedhead

## JOSS BED

### BY TOAN NGUYEN

Graduating from the ENSCI (Paris) in 1995, Toan Nguyen pursued his training in Barcelona with Alberto Lievore, moving to Milan in 1996, where not long after he took over as head of Antonio Citterio's design department, with whom, for nearly ten years he was to sign lines for, among others, Axor-Hansgrohe, B&B Italia, Flos, Iittala, Kartell, Technogym, and Vitra. In 2009 he founded his own studio in Milan, subsequently embarking on a series of successful collaborations with several major brands in high-quality industry and fine craftsmanship in Europe, North America, and Asia, on furniture, lighting, ceramics, as well as on technological products.

For Toan Nguyen design is a discipline intimately bound up with the object, in the traditional sense of the term. Priority is given to physical relationships with users—to them sitting, washing, lighting, etc. Displaying an immediate sense for meaningful utilization, precedence is accorded to intelligible forms and optimized manufacturing processes, without, however, ever neglecting the sensuality of materials and the emotional impact of the object.

Toan Nguyen's creative individuality has been acknowledged by flagship contemporary design brands such as District Eight, Dedon, Laufen, Bugatti Home, Fendi Casa, Coalesse, Teknion, Studio TK, Vibia, Viccarbe, Walter Knoll, Lema, Busnelli, Wendelbo, RH, among others, a substantial number of whose creations have been awarded prestigious international prizes.
